ImmuCell Adds Jacee Lancaster to Its Commercial Team to Support the Company's Continued Sales Growth

PORTLAND, Maine (June 30, 2026) — ImmuCell Corporation is pleased to announce the company's fifth new hire in the past three months amid a period of rapid growth: Jacee Lancaster has joined as Sales and Marketing Manager for the Western region, covering Washington, Oregon, Idaho, Montana, Wyoming, Utah and Alaska. She will focus on helping dairy and beef producers, veterinarians, and distribution partners to better understand how ImmuCell's First Defense® product line protects newborn calves. First Defense provides calves with immediate immunity against the most common scours-causing pathogens, including *E. coli*, coronavirus, and rotavirus.

“We’re thrilled to have Jacee leading our Western territory, a competitive market with significant growth potential. She has the tenacity and people skills needed to build strong on-farm relationships. As a current and long-time user of First Defense, Jacee has already seen the value of immediate immunity and our unique hyperimmunization technology, making her a knowledgeable resource for producers looking to strengthen their newborn calf care programs,” says Bobbi Brockmann, ImmuCell Senior Vice President of Sales and Marketing.

Lancaster has a strong background in agriculture and producer relations. Prior to joining ImmuCell, she served as Livestock Director for the Utah State Fair, overseeing all livestock

events, producing Utah's Own PRCA Rodeo, and training employees. In April 2026, Lancaster was named to the COWGIRL 30 Under 30 from a field of nearly 200 applicants. Honorees are recognized for professional achievement, leadership, integrity, and a deep commitment to the Western way of life.

Born and raised in south-central Idaho, Lancaster's agriculture roots include 4-H, FFA, and rodeo. She learned about responsibility and acquired a strong sense of community through livestock raising. Lancaster is an Idaho State University graduate.

About ImmuCell

ImmuCell Corporation (Nasdaq: ICCC) is an animal health biologics company serving the dairy and beef industries with practical, science-based solutions that improve the survivability, health, and long-term performance of dairy and beef calves. The Company's primary product line, **First Defense®**, provides Immediate Immunity™ through orally delivered antibodies against the principal viral and bacterial causes of scours, one of the most prevalent and deadly diseases in neonatal calves worldwide. Press releases and other information about the Company are available at <http://www.immucell.com>.
